

TCD VPS ATL code - 325310047

Greetings!

We are happy to share that AIM in collaboration with Coding Elements has launched the ATL Python Learning Module on 28th August 2020 for the ATL students and teachers. Students and teachers from all around the country can now very quickly learn the fundamentals of programming and logic using Python.

You can click on the link below to access the Python Learning course. You may forward this email to your students as well. Do share your correct ATL UID with your students. Students will need the ATL UID to register for the course.

Link to module: <https://www.codingelements.com/python-foundation-course/>

We look forward to full participation from your school.

Warm regards

AIM Team
